Test & Live Environments

Test Endpoint: https://api-test.onestopinc.com/
Live Endpoint: https://api.onestopinc.com/

Orders created via the Test Endpoint will only exist in the test environment, and will not actually be charged or shipped.

Required Headers

In order to call any of the following endpoints, be sure to include the Key "Authorization" and the Value "Token {your_API_token}" in the request's headers. If you want a specific version of the API, please include that in the Accept Header like so: "application/json; version=1.0" (version 1.0 is the default version). For example:

```
headers = {
    "Authorization": "Token 123abc456def789a0b1c2d3f4567890abcdef123",
    "Accept": "application/json; version=1.0"
    "Content-Type": "application/json"
}
```

API tokens can be regenerated on the Dashboard page if you ever lose it. Note that generating a new token will invalidate the existing token for your account.

Accounts on Hold

All newly created accounts are automatically placed on hold until approved by staff. After this, if for any reason your account should be placed on hold, the following error message will be shown when attempting to access endpoints. Please contact customer service to resolve the hold.

    "detail": "Your account is on hold. If your account was recently registered, please wait for a member of our staff to approve it and remove the hold. Otherwise, please contact customer service at 1-800-968-7550 to resolve the issue."
}
```

API Maintenance Breaks

When the One Stop website is placed into ordering-disabled mode due to maintenance being performed on our inventory system, the API will also be temporarily disabled. Maintenance usually happens for only a few minutes some time between 5 am and 6:30 am Eastern.

```
{
    "detail": "The API is currently disabled for maintenance. Please try again later."
}
```

Rate Limit

API calls are limited to 60 per minute. If you exceed that limit, you will see the following error message (with XX being the number of seconds until the next API call is allowed):

```
{
    "detail": "Request was throttled. Expected available in XX seconds."
}
```

Documents & Endpoints (Click an entry to expand)

About: Pricing

```
**Prices are in cents as Integers.** A price of 281 is equivalent to $2.81.

Pricing reflects the current price.  An item may be on sale and the price will reflect that discounted price.
```

price_level is your pricing level. It can be one of 'case', 'dozen', or 'piece' and that price will be reflected as **my_price.**

If case pricing is 0 and you have case pricing, the price will then default to the piece price.

Example Response (from /items/pricing/?skus=GD-110-36-XL):

```
{
    "results": [
        {
            "GD-110-36-XL": {
                "sku_code": "GD-110-36-XL",
                "gtin": "00821780002261",
                "on_hand": 28994,  // current inventory
                "pricing": {
                    "case": 281,
                    "dozen": 281,
                    "piece": 281,
                    "my_price": 281 // the price you pay, reflected by price_level
                },
                "price_level": "case", // your price level. One of: case, dozen, piece
                "pieces_per_case": "72",
                "on_sale": true,
                "on_sale_until": "06/30/2025", // will not be included in the response if "on_sale": false
                "tracking_number": "55519",
                "size_number": "5",
            }
        }
    }
}
```

About: Referencing Items

/items/ is the endpoint for a list of all products and how to reference them.

ping/

```
        {
            "uid": "55479-5",
            "code": "GD-110-32-XL",
            "gtin": "00821780002152",
            "tracking_number": 55479,
            "size_number": "5",
            "active_flag": "Y",
            "last_updated_on": "2025-07-16T16:12:42.268741-
04:00"
        }
```

Our OneStop Sku Code is structured as mill_code-style_code-color_code-size_code (ex. GD-110-32-XL).

The best, most accurate way to refer to items is the UID (made up of tracking_number-size_number). It is a primary key.

tracking_number refers to the item in a certain color (ex. 55479 is GD-110-32) and size_number is an integer 1-6. Larger sizes, for example 2X, 3X, 4X, may have a different tracking_number and have 6 for the size_number.
GD-110-32-SM = 55479-2
GD-110-32-MD = 55479-3
GD-110-32-LG = 55479-4
GD-110-32-XL = 55479-5
GD-1102X-32-2X = 55839-6
GD-1103X-32-3X = 56199-6

OneStop Code is the next best recommendation. It is more descriptive, but they do change very infrequently, which is why UID is recommended first. OneStop Code is unique.

Not all of our products have a GTIN associated (ex. Enza brand), so if you want full product line access, GTIN should not be your choice to access our products. GTIN is not currently forced to be unique in our database (as it can be blank).

Cross Reference Skus are also available if you want to use your own identifiers and match them to our OneStop Codes. See https://api.onestopinc.com/cross-ref-manage/

How To: Finding Items

Let's say we wanted to find One Stop's style GD110. This is the same as Gildan's style 8000. There are several ways we could search for it. The most direct way, since we know the mill and the style, is:

https://api.onestopinc.comitems/?mill=Gildan&mill_style_code=8000
-or-
https://api.onestopinc.comitems/?mill=GD&mill_style_code=8000

These equivalent endpoints bring up 156 results. Why? It includes all of Gildan 8000's sizes and colors. To see just the style information, add the flat=Y parameter:

https://api.onestopinc.com/items/?mill=Gildan&mill_style_code=8000&flat=Y

You can use the flat=Y parameter for general searching, and discard the flat=Y parameter if you want a detailed result containing all possible variations of the product you're searching for.

Now that we've found a result using flat=Y, we can get more information about the style by taking the first result, GD110. This is One Stop's style code. It can then be applied to the endpoint:

https://api.onestopinc.com/items/style/GD110/

This endpoint provides general information about GD110 (Gildan 8000), including its available colors and images.

If you wanted all of GD110's sizes and colors, including estimated inventory (on_hand) and ordering information, you

could use the style parameter to pull the specific One Stop style:

https://api.onestopinc.com/items/?style=GD110

You can then choose which size and color to order. If we wanted a Medium in Ash, we would take note of either the style code (GD-110-95-MD), GTIN (00821780002290), or tracking_number (55659) & size_number (3). These are 3 of the ways you can use to order items via the API.

Going one step farther, if you wanted more information about GD110 Medium in Ash, including pricing, weight, case quantities, and real-time inventory, use:

https://api.onestopinc.com/code/GD-110-95-MD/

See How To: Ordering to learn how to apply the code, GTIN, or tracking & size number values in the preflight and orders endpoints.

There are several other parameters that can be used for searching. We recommend trying various combinations to find what works best for you.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack.

items/ Lists all skus, minimal identifiers (uid (tracking_number-size_number), code, gtin, size_number, tracking_number)
items/?fields=web_name,... Returns only the specified fields
items/?flat=Y Returns top-level results (all styles, without their colors & sizes)
items/?search=GD110 Filters skus by the search query (searches multiple fields)
items/?search=GD110&flat=Y Filters skus by the search query (searches multiple fields), but gives top-level results

(Styles, without their colors & sizes)
items/?code=GD-110-36-XL Filters skus by icontains on code (GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345 Filters skus by GTIN
items/?mill=Gildan Filters skus by icontains on mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110 Filters skus by iexact on style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false Filters skus by true/false if the item is supplies (use false for apparel)

How To: Ordering

There are multiple ways to place an order through the API. The difference lies in how you'd like to designate the items in your order request body. We allow ordering through tracking numbers (default), GTINs, One Stop Skus (recommended), and Customer Cross Reference Skus.

The endpoints for each are as follows:
/orders/create/ Order by Tracking Number & Size (ex. tracking_number=1076399, size=3)
/orders/sku/create/ Order by One Stop Sku (ex. code=GD-110-36-XL)
/orders/gtin/create/ Order by GTIN (ex. gtin=00764970342323)
/orders/reference/create/ Order by Customer Cross Reference Sku (your Sku matched to our Sku. ex. customer_sku=YOURSKU)

Tracking Numbers, One Stop Skus, and GTINs can all be found using the /items/ endpoints. Customer Cross Reference Skus can be added and maintained via /items/reference/ endpoints, or in the Manage Cross References section of the Dashboard.

It is HIGHLY recommended to use the corresponding preflight endpoint BEFORE placing your orders. The preflight endpoint will tell you if your order will be successful, and will also return details about each item and other order information

```
that you can use to verify that the order is accurate.
/preflight/ endpoints do NOT create the order.

/orders/preflight/
/orders/sku/preflight/
/orders/gtin/preflight/
/orders/reference/preflight/

The Order Request Body:
{
    "cvv": "", // This is only required when using a credit
card
    "po_number": "PO12345", // 15 character limit, no &, >,
or <
    "line_items": [
        {
            // Use with /orders/create/
            "tracking_number": 1076399, // Tracking Number,
Size example
            "size": 4,
            "quantity": 1,
        },
        {
            // Use with /orders/sku/create/
            "code": "GD-110-36-XL" // One Stop Sku Code
example
            "quantity": 1,
        },
        {
            // Use with /orders/gtin/create/
            "gtin": "00764970342323" // GTIN example
            "quantity": 1,
        },
        {
            // Use with /orders/reference/create/
            "customer_sku": "YOURSKU" // Customer Cross
Reference Sku example
            "quantity": 1,
        }
    ],
```

```
    "terms_number": 1, // This is the payment method. Find values for this at /customer/terms/ or on your Dashboard
    "address_number": 2, // This is the shipping address. Find values for this at /customer/addresses/ or on your Dashboard
    "ship_via_number": 1 // This is the shipping method (UPS, etc.). Find values for this at /customer/shipping/
}
```

Payment Terms can be added by contacting Customer Service. Though, your existing One Stop payment methods also exist on the API already.

Addresses can be added using the endpoint /customer/addresses/add/ or by using the Dashboard on One Stop (https://onestopinc.com/dashboard/addresses/). See the endpoint documentation for /customer/addresses/add/ for information on using temporary vs. permanent addresses.

The ship_via_number is dependent on the address_number and terms_number used, so it is recommended to ensure that the ship_via_number you want to use is available for the combination of terms and address used. Use the /customer/shipping/ endpoint to see all valid ship_via_number options.

customer/addresses/ **GET**

Retrieves the shipping addresses available.

number from this endpoint is used in Order Creation as **address_number.**

Example Response Body

```
{
    "status": "Success",
    "results": [
        {
            "zip": "495440000",
```

```
            "city": "GRAND RAPIDS",
            "phone": null,
            "state": "MI",
            "number": 0,
            "address": "2686 NORTHRIDGE DR",
            "country": "US",
            "address2": "",
            "temporary": "N",
            "description": "bill_to",
            "company_name": "TEST ACCOUNT",
            "contact_name": "TESTER BILLY BOB"
        },
        {
            "zip": "337700000",
            "city": "LARGO",
            "phone": null,
            "state": "FL",
            "number": 1,
            "address": "210 EAST BAY DRIVE",
            "country": "US",
            "address2": "SUITE 23",
            "temporary": "N",
            "description": "ship_to",
            "company_name": "TEST ACCOUNT",
            "contact_name": ""
        }
    ]
}
```

customer/addresses/add/ **POST**

Adds a new address to your One Stop account.

state must be the 2-letter code
temporary must be "Y" or "N"

The **address_number** that is returned in the successful response is to be used in /orders/preflight/ and /orders/create/ as the shipping address.

Temporary addresses will not show in /customer/addresses/. Consider temporary addresses as one-time use and verify using the /orders/preflight/ endpoint that the address is correct before placing an order.

An indication that the address is temporary, is that the number is between 60000-65635.

An account may have 250 permanent addresses.

An address_number's information can also be checked using /customer/addresses/get/ADDRESS_NUMBER/.

Example Request Body

```
{
    "city": "Grand Rapids",
    "name": "First Last",
    "state": "MI",
    "company": "One Stop",
    "address1": "2686
Northridge Dr NW",
    "address2": "Suite 1",
    "address3": "",
    "zip_code": 49544,
    "temporary": "Y"
}
```

Example Response Body

```
{
    "status":
"Success",
    "address_number":
"65535"
}
```

Example Error Responses

```
{"error": "name is required"}
{"error": "address1 is required"}
{"error": "city, state, and zip_code are required"}
{"error": "temporary must Y or N"}
{"error": "Invalid state - must be 2 characters"}
```

The error response below means that the address was not added because it was somehow invalid. Seen with

```
temporary='Y':
{
    "status": "Failed",
    "error": "Address not validated"
}

The error response below means that the address was added,
but will not work for ordering and will return the reason
why when trying to order with it.  Example: bad city, or
city does not match zip code.  Seen with temporary='N':
{
    "address_number": "55",
    "status": "WARNING",
    "error": "Address not validated.  Processed as
entered."
}
```

customer/addresses/get/123/ **GET**

Returns address information for the given address_number.

Replace 123 in the URL with the address number you'd like information about.

Temporary addresses will return the temporary flag as 'N' using this endpoint, but an indication that the address is in fact temporary, is that the number is between 60000-65635.

An account may have 250 permanent addresses.

Example Response Body

```
{
    "zip": "495449109",
    "city": "GRAND RAPIDS",
    "state": "MI",
    "number": "65535",
    "status": "Success",
    "address": "2686 NORTHRIDGE DR NW STE 1",
```

```
    "country": "US",
    "address2": "Suite 1",
    "temporary": "N",
    "description": "ship_to",
    "company_name": "One Stop",
    "contact_name": "First Last"
}
```

customer/invoices/ **GET**

Retrieves invoices.

Shows open invoices and credits.

Example Response Body

```
{
    "status": "Success",
    "results": [
        {
            "terms": "Net 30 Days",
            "balance": "263.80",
            "due_date": "04/16/2025",
            "po_number": "PONUMBER1",
            "type_desc": "Invoice",
            "type_number": "1",
            "invoice_date": "03/17/2025",
            "order_number": "1-1-1234567",
            "invoice_number": "1234567"
        },
        {
            "terms": "Net 30 Days",
            "balance": "236.40",
            "due_date": "04/16/2025",
            "po_number": "PONUMBER2",
            "type_desc": "Invoice",
            "type_number": "1",
            "invoice_date": "03/17/2025",
            "order_number": "1-1-1234568",
```

```
            "invoice_number": "1234568"
        },
        {
            "terms": "Net 30 Days",
            "balance": "309.05",
            "due_date": "04/16/2025",
            "po_number": "PONUMBER3",
            "type_desc": "Invoice",
            "type_number": "1",
            "invoice_date": "03/17/2025",
            "order_number": "1-1-1234569",
            "invoice_number": "1234569"
        }
    ]
}
```

customer/shipping/ **POST**

Retrieves the shipping methods available.

number from this endpoint is used in Order Creation as **ship_via_number.**

address_number can be found using endpoint /customer/addresses/.
terms_number can be found using endpoint /customer/terms/.

Note: The results of this endpoint can change depending on the address_number and terms_number used. For example, some address_numbers may reflect residential addresses, and some may reflect commercial addresses, which would change the shipping methods (and number, used as ship_via_number in ordering) available in the list. It is therefore recommended to check this endpoint before placing orders or providing shipping methods.

Example Request Body	Example Response Body

```
{
"terms_number": 2,
"address_number": 0
}
```

```
{
    "status": "Success",
    "results": [
        {
            "number": "1",
            "description": "A. UPS GROUND COMMERCIAL"
        },
        {
            "number": "10",
            "description": "B. CUSTOMER PICKUP"
        },
        {
            "number": "3",
            "description": "C. UPS 3 DAY SELECT COMM"
        },
        {
            "number": "2",
            "description": "D. UPS 2 DAY AIR COMM"
        },
        {
            "number": "16",
            "description": "E. UPS 2 DAY AIR AM COMM"
        },
        {
            "number": "188",
            "description": "F. UPS 1 DAY AIR SAV COMM"
        },
        {
            "number": "4",
            "description": "G. UPS 1 DAY AIR COMM"
        },
        {
            "number": "11",
```

```
            "description": "HERE AND
NOW"
        },
        {
            "number": "187",
            "description": "I. UPS SAT
1 DAY AIR COMM"
        }
    ]
}
```

Example Error Responses

```
{"error": "terms_number is required and must be numeric"}
{"error": "address_number is required and must be
numeric"}

Incorrect terms_number or address_number will yield empty
results:
{
    "results": [],
    "status": "Success"
}
```

customer/terms/ **GET**

Retrieves the terms (payment methods) available.

number from this endpoint is used in Order Creation as **terms_number.**

term number 112, Online Check (E-Check), is NOT currently valid with the API.

Example Response Body

```
{
    "status": "Success",
    "results": [
        {
            "term": "COD Cashier's Check/MO",
            "number": "2",
            "default": false
        },
        {
            "term": "COD Company Check",
            "number": "1",

}
```

items/ **GET**

Lists all SKUs.

This endpoint can take some time to run. It is recommended to use the following parameters:

search, code, gtin, mill, mill_style_code, style, fields,

flat, and supplies parameters are available and can all stack.

Add the **flat** parameter to the other parameters above to return only top-level styles (not each of their sizes & colors).

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
(searches multiple fields)
items/?search=GD110&flat=Y  Filters skus by the search query
(searches multiple fields), but gives top-level results
(Styles, without their colors & sizes)
items/?code=GD-110-36-XL    Filters skus by icontains on code
(GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345  Filters skus by GTIN
items/?mill=Gildan          Filters skus by icontains on
mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110            Filters skus by iexact on
style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false       Filters skus by true/false if the
item is supplies (use false for apparel)
```

Append "https://media.onestopinc.com/" to image paths for the full path (ex. https://media.onestopinc.com/images/styles/standard/GD110.jpg).

Example Response Body

        }
    ]
}
```

items/categories/ **GET**

Retrieves all item categories.

Example Response Body

```
{
    "count": 279,
    "status": "Success",
    "categories": [
        "1/4 Zip",
        "100% Cotton",
        "100% Polyester",
        "Wool",
        "Workwear",
        "Wovens",
        "Yard Rolls",
        "Youth"
    ]
}
```

items/categories/styles/ GET

Retrieves all item categories and styles under each one.

Add the **search** parameter to refine results based on mill_name, web_name, web_description, and categories.

Ex. /items/categories/styles/?search=Gildan

Example Response Body

```
{
    "status": "Success",
    "results": {
        "Tees": [

items/code/GD-110-36-XL/ **GET**

Retrieves detailed item data for the SKU Code.

Replace "GD-110-36-XL" in the URL example with any SKU Code.

"No Sku matches the given query." will be returned if the SKU is not found.

Prices are in cents as Integers. A price of 281 is equivalent to $2.81. price_factor is usually 2, meaning to divide the price by 100 to get the dollar amount. A price_factor of 3 (some Stahls products) would mean to divide the price by 1000.

Example Response Body

```
{
    "code": "GD-110-36-XL",
    "gtin": "00821780002261",

items/?gtin=00764970342248 **GET**

Filters the /items/ endpoint by GTIN.

GTIN should be 12 or 14 digits.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack.

Add the **flat** parameter to the other parameters above to return only top-level styles (not each of their sizes & colors).

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
(searches multiple fields)
items/?search=GD110&flat=Y  Filters skus by the search query
(searches multiple fields), but gives top-level results
(Styles, without their colors & sizes)
items/?code=GD-110-36-XL    Filters skus by icontains on code
(GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345  Filters skus by GTIN
items/?mill=Gildan          Filters skus by icontains on
mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110            Filters skus by iexact on
style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false       Filters skus by true/false if the
item is supplies (use false for apparel)
```

Append "https://media.onestopinc.com/" to image paths for the full path (ex. https://media.onestopinc.com/images/styles/standard/GD110.jpg).

Example Response Body

items/gtin/00764970342323/ GET

Retrieves detailed item data by GTIN.

Replace "00764970342323" in the URL example with any GTIN.

GTIN should be 12 or 14 digits.

"No Sku matches the given query." will be returned if the GTIN is not found.

Example Response Body

```

items/inventory/ GET

Lists all inventory on-hand.

search, code, gtin, mill, mill_style_code, style, and supplies parameters are available and can all stack**.**

```
    items/inventory/                            Returns
on_hand, filter with the parameters below
    items/inventory/?search=GD110               Filters skus
by the search query (searches multiple fields)
    items/inventory/?code=GD-110-36-XL          Filters skus
by icontains on code
    items/inventory/?gtin=00764970324336        Filters skus
by GTIN
    items/inventory/?mill=Gildan                Filters skus
by icontains on mill_code or mill_name
    items/inventory/?style=GD110                Filters skus
by iexact on style_code, icontains on style
    items/inventory/?supplies=true              Filters skus
by true/false supply flag
    items/inventory/?mill_style_code=1717       Filters skus
by mill_style_code
    items/inventory/?gtins=00821780002261,...   Returns
on_hand for specified GTINs
    items/inventory/?skus=GD-110-36-XL,...      Returns
on_hand for specified Sku Codes
```

    ]
}
```

items/inventory/?gtins=gtin1,gtin2,gtin3 GET

Returns on_hand inventory for the specified GTINs.

The example response below is the result of /items/inventory/?gtins=00821780002261,00764970325234,00821780002526,0082178000241

If you'd like to use Skus, the endpoint should look like: https://api.onestopinc.com/items/inventory/?skus=GD-110-36-XL,A4-182-90-MD,GD-1102X-76-2X,GD-110-44-LG and the results keys will be the One Stop Sku Codes queried.

on_hand is the current inventory for the item.

You may query up to 20 items at a time.

Example Response Body

```
{
    "status": "Success",
    "results": [
        {
            "00821780002261": {

```

items/?mill=Gildan GET

Filters the /items/ endpoint by mill.

Filter by mill code (ex. GD) or name (ex. Gildan). Find valid inputs with the /items/mills/ endpoint.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack.

Add the **flat** parameter to the other parameters above to return only top-level styles (not each of their sizes & colors).

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
(searches multiple fields)
items/?search=GD110&flat=Y  Filters skus by the search query
(searches multiple fields), but gives top-level results
(Styles, without their colors & sizes)
items/?code=GD-110-36-XL    Filters skus by icontains on code
(GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345  Filters skus by GTIN
items/?mill=Gildan          Filters skus by icontains on
mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110            Filters skus by iexact on
style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false       Filters skus by true/false if the
item is supplies (use false for apparel)

Append "https://media.onestopinc.com/" to image paths for the
full path (ex.
https://media.onestopinc.com/images/styles/standard/GD110.jpg).

            "mill_name": "Badger Sport"
        }
    ]
}
```

items/pricing/ **GET**

This endpoint is meant to grab Pricing, including MSRP, for all items. This should be used more to initially populate pricing. The data in this endpoint is updated once daily at 4:30 am Eastern.

Since pricing can change throughout the day, it is recommended to re-grab prices by appending ?refs=, ?gtins=, ?

skus=, or ?styles= to /items/pricing/, or by visiting the item directly using /items/code/SKU_CODE/, /items/gtin/GTIN/ or /items/tracking/TRACKING_NUMBER/. "my_price" on these endpoints is the price you'll pay for the item. Pricing is also shown on Order Preflight endpoints.

The /items/pricing/ endpoint has a large amount of data to return. In order to prevent timeouts, we recommend appending ?supplies=true and ?supplies=false to break up the data into 2 parts. You may also filter by ?mill= with the 2-character mill code (ex. GD) or mill name (ex. Gildan). Finally, to further reduce the size of the data returned, you can append ?fields= to only return the fields you're interested in (ex. ?fields=gtin,pricing,msrp).

Note in the example response below that the pricing dictionary can contain "piece," "dozen," and "case" dictionaries, but they are not required to be there (for example, dozen and case may be missing). Note also items with quantity break pricing, as seen in the example.

MSRP is 2 x Case Price, where available. Or, 2 x Dozen Price if Case is not available on Apparel items. "msrp" will not be in the response if it is not available.

Prices are in cents as Integers. A price of 281 is equivalent to $2.81. pfactor aka price_factor is usually 2, meaning to divide the price by 100 to get the dollar amount. A pfactor of 3 (some Stahls products) would mean to divide the price by 1000.

```

items/pricing/?gtins=gtin1,gtin2,gtin3 **GET**

Returns pricing for GTINs or One Stop Sku Codes comma-separated after the ?gtins= or ?skus= parameter.

The example response below is the result of: /items/pricing/?gtins=00821780002261,00764970325234,00821780002526,0082178000241

If you'd like to use Skus, the endpoint should look like: https://api.onestopinc.com/items/pricing/?skus=GD-110-36-XL,A4-182-90-MD,GD-1102X-76-2X,GD-110-44-LG and the results keys will be the One Stop Sku Codes queried.

Prices are in cents as Integers. A price of 281 is equivalent to $2.81. price_factor is usually 2, meaning to divide the price by 100 to get the dollar amount. A price_factor of 3 (some Stahls products) would mean to divide the price by 1000.

Pricing reflects the current price. An item may be on sale and the price will reflect that discounted price.

on_hand is the current inventory for the item.
my_price is the price you pay, reflected by your **price_level**.

You may query up to 20 items at a time.

```

items/pricing/?styles=style1,style2 **GET**

Returns pricing for the specified styles, comma-separated after the ?styles= parameter.

The example response below is the truncated result of /items/pricing/?styles=GD110,A4182.

Prices are in cents as Integers. A price of 281 is equivalent to $2.81. price_factor is usually 2, meaning to divide the price by 100 to get the dollar amount. A price_factor of 3 (some Stahls products) would mean to divide

the price by 1000.

Pricing reflects the current price. An item may be on sale and the price will reflect that discounted price.

on_hand is the current inventory for the item.
my_price is the price you pay, reflected by your **price_level**.

You may query up to 5 styles at a time.

Example Response Body

```

items/?search=GD110 **GET**

Filters the /items/ endpoint by the search query.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack.

Add the **flat** parameter to the other parameters above to return only top-level styles (not each of their sizes & colors).

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
```

(searches multiple fields)
items/?search=GD110&flat=Y Filters skus by the search query (searches multiple fields), but gives top-level results (Styles, without their colors & sizes)
items/?code=GD-110-36-XL Filters skus by icontains on code (GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345 Filters skus by GTIN
items/?mill=Gildan Filters skus by icontains on mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110 Filters skus by iexact on style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false Filters skus by true/false if the item is supplies (use false for apparel)

Append "https://media.onestopinc.com/" to image paths for the full path (ex. https://media.onestopinc.com/images/styles/standard/GD110.jpg).

    ]
}
```

items/?search=GD110&flat=Y GET

Filters skus by the search query (searches multiple fields), but gives top-level results (Styles, without their colors & sizes).

Add the **flat=Y** parameter to the URL with the any other parameter to return results that only show the top-level style, without each size and color belonging to that style.

flat can be one of ['Y', 'yes', 'true', 'True'], any other value (or lack thereof) will not flatten the search results.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack and be used with flat.

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
(searches multiple fields)
items/?search=GD110&flat=Y  Filters skus by the search query
(searches multiple fields), but gives top-level results
(Styles, without their colors & sizes)
items/?code=GD-110-36-XL    Filters skus by icontains on code
(GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345  Filters skus by GTIN
items/?mill=Gildan          Filters skus by icontains on
```

mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110 Filters skus by iexact on style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false Filters skus by true/false if the item is supplies (use false for apparel)

Append "https://media.onestopinc.com/" to image paths for the full path (ex. https://media.onestopinc.com/images/styles/standard/GD110.jpg).

items/style/GD110/ **GET**

Retrieves Style information.

Replace "GD110" in the URL example with any Style.

Styles can be found using /items/ endpoints.

Append "https://media.onestopinc.com/" to any image path for the full path (ex. https://media.onestopinc.com/images/styles/standard/A4022.jpg).

Example Response Body

```

items/?supplies=true **GET**

Filters the /items/ endpoint by apparel or supplies.

search, code, gtin, mill, mill_style_code, style, fields, flat, and supplies parameters are available and can all stack.

Add the **flat** parameter to the other parameters above to return only top-level styles (not each of their sizes & colors).

```
items/                      Lists all skus, minimal
identifiers (uid (tracking_number-size_number), code, gtin,
size_number, tracking_number)
items/?fields=web_name,...  Returns only the specified fields
items/?flat=Y               Returns top-level results (all
styles, without their colors & sizes)
items/?search=GD110         Filters skus by the search query
(searches multiple fields)
items/?search=GD110&flat=Y  Filters skus by the search query
(searches multiple fields), but gives top-level results
(Styles, without their colors & sizes)
items/?code=GD-110-36-XL    Filters skus by icontains on code
(GD-110-36-XL), icontains on style (GD110)
items/?gtin=12345678912345  Filters skus by GTIN
items/?mill=Gildan          Filters skus by icontains on
mill_code (ex. GD) or mill_name (ex. Gildan)
items/?mill_style_code=1717 Filters skus by mill_style_code
items/?style=110            Filters skus by iexact on
style_code (ex. 110), icontains on style (ex. GD110)
items/?supplies=false       Filters skus by true/false if the
item is supplies (use false for apparel)

Append "https://media.onestopinc.com/" to image paths for the
full path (ex.
https://media.onestopinc.com/images/styles/standard/GD110.jpg).
```

orders/create/ **POST**

orders/delete/1-1-1234567/ **GET**

Deletes an Order created through the API.

Replace "1-1-1234567" in the URL example with your Order Number.

Deletes orders placed through the API only. There is a 10 minute window to delete an order. **After 10 minutes, the order cannot be cancelled.**

Example Response Body

```
{
    "code": "OK",
    "text": "Delete message recorded on: 1-1-6559500",
    "status": "Success"
}
```

orders/detail/1-1-1234567/ GET

Retrieves details of an Order Number.

Replace "1-1-1234567" in the URL example with your Order Number.

Example Response Body

```

        }
    ]
}
```

items/reference/inventory/CUSTOMERSKU/ **GET**

Retrieves the inventory on-hand for the custom SKU (cross reference).

Replace "CUSTOMERSKU" in the URL example with your custom SKU.

Example Response Body

```
{
    "on_hand": 28763,
    "onestop_sku": "GD-110-36-LG",
    "customer_sku": "CUSTOMERSKU"
}
```

items/reference/pricing/ GET

This endpoint is meant to grab Pricing, including MSRP, for all items. This should be used more to initially populate pricing. The data in this endpoint is updated once daily at 4:30 am Eastern.

Since pricing can change throughout the day, it is recommended to re-grab prices by appending ?refs= to /items/reference/pricing/, or by visiting the item directly using /items/reference/detail/CUSTOMERSKU/. "my_price" on these endpoints is the price you'll pay for the item. Pricing is also shown on Order Preflight endpoints.

Note in the example response below that the pricing dictionary can contain "piece," "dozen," and "case" dictionaries, but they are not required to be there (for example, dozen and case may be missing). Note also items with quantity break pricing, as seen in the example.

MSRP is 2 x Case Price, where available. Or, 2 x Dozen Price if Case is not available on Apparel items. "msrp" will not be in the response if it is not available.

Prices are in cents as Integers. A price of 281 is equivalent to $2.81. pfactor aka price_factor is usually 2, meaning to divide the price by 100 to get the dollar amount. A pfactor of 3 (some Stahls products) would mean to divide the price by 1000.

```

returns/cancel/01012512345/ **GET**

Cancels a Return by RA Number.

Replace "01012512345" in the URL example with your RA Number.

Return Number (also called OD Number) is not the same as RA Number. Return Number starts with the 4-digit year (ex. 2025). RA Number starts with the date as MMDDYY (ex. 051925).

You can list all Returns and find the RA Number by using the endpoint: /returns/.

Example Response Body

```
{
    "status": "Success"
}
```

returns/create/ **POST**

returns/detail/ **GET**

Lists all Returns with details.

Results can be filtered by adding **?active=true** (returns in progress) or **?active=false** (returns completed) to the URL.

returns/detail/20250331HXJA5P/ **GET**

Retrieves a Return by Return Number.

Replace "20250331HXJA5P" in the URL example with your Return Number.

Return Number (also called OD Number) is not the same as RA Number. Return Number starts with the 4-digit year (ex. 2025). RA Number starts with the date as MMDDYY (ex. 051925).

You can list all Returns and find the Return Number by using the endpoint: /returns/.
